

## **The Future is Looking Bright!**

**Franklin REC has devoted the summer of 2021 to exchanging all Franklin REC owned mercury vapor and high-pressure sodium yard lights for LED yard lights. By installing LED yard lights, we reduce the electrical consumption and increase the lifetime of the yard light.**

**What are the benefits of installing a new LED yard light through Franklin REC? The installation, maintenance, and kilowatt usage are all covered by the monthly rate of \$9.50 (plus tax)!**

**If you are interested in installing a yard light at your property, please call our office at (641) 456-2557.**
