

**Don't forget to call Iowa One Call BEFORE you start your digging, trenching, or excavating project! Iowa law requires all underground utilities to be located before you begin your project.**

At least 48 hours before digging, call Iowa One Call at 811 so that utilities (electric, gas, communications, water, and sewer) can mark their services. Locates are FREE, and the call center is open 24/7. Making this one phone call can eliminate disruption of service and, more importantly, reduces the chance of injury.

**Know what's below.  
Call before you dig.**
